

November 2, 2022

The August 22, 2022 Olympia Police Department officer involved shooting is still ongoing.

To clarify previous information released in the media, the investigation will not be complete this week or next. Several key pieces of evidence are still at the state crime lab undergoing testing and analysis. This process takes time and is dependent upon the testing procedure and workload of the forensic scientist.

After the results are received, information must be analyzed and reports finalized. Once the CMIIT investigation is completed, a briefing will be scheduled with the assigned prosecuting attorney's office.

Given these many variables and the amount of work still necessary, no timeline for the completion of this investigation is available. The CMIIT Team will complete its investigation as soon as possible while working diligently to ensure the investigation is thorough, detailed, and accurate.

The CMIIT strives to provide accurate and timely information about the investigation to enhance transparency with the community.
